

## SUPERCHIP 3815 FLASHPAQ TUNER FOR 2004-2005 DODGE RAM V8 5.7L HEMI TRUCK

This is a high-powered tuning and data acquisition tool set up specifically for 2004-2005 Dodge Ram Hemi. It houses specialized databases that contain optimally calibrated, individual vehicle application, performance programs which tune both the engine and transmission. Superchips calibrations include optimization of the entire power bank – from idle to redline! Part throttle, as well as wide open throttle is covered. It includes 91 Octane, 87 octane economy and 91 octane towing performances for stock vehicles. Additional features are adjustable vehicle top speed and engine rev limiter; adjustable tire height; Internet updateable; built-in DTC definitions (no look-up manual needed); built-in help screens; connects to any PC with USB; custom application upgradeable (download customs); multiple user selectable tuning levels; increased user options; ergonomically designed case that fits well in hand; large, soft key buttons that are easy to operate; permanently mounted cable (no assembly required); 300% bigger screen that includes graphics support; and easy to view day or night backlight screen. See [www.superchips.com](http://www.superchips.com) for additional tuning levels

Purchased new at \$520; used once; will sell for only \$375; comes with manual.
